

# We are hiring.

We are **pmd**, the world's leading supplier of 3D image sensor technologies based on the Time-of-Flight principle. Our customers from the consumer, automotive, industrial automation, robotics and medical technology industries trust our reliable reference designs and powerful image sensors for 3D distance measurements. Our technology is integrated into smartphones, VR/AR headsets, robots, and smart home devices.

More than 300 worldwide patents in this field, numerous awards and agile, dynamic product teams characterize our strong and innovative focus. We belong to the internationally operating ifm group with more than 7.000 employees.

Can you imagine? Then join us and become a part of our team.

## Technical Project Manager (m/f/d) for 3D Camera Development

in Shanghai, China

### Your tasks:

You will lead and coordinate an interdisciplinary project team of engineers and physicists in the development of 3D camera modules for integration into smartphones. After an extensive training phase you will be assigned to a first customer project. You are in close contact with the customer and based on your well-structured and independent work style you will coordinate support tasks in an international environment. Your pronounced communication skills enable you to successfully achieve project goals in cooperation with suppliers, manufacturers and customers. Your responsibilities also include the coordination of local employees in Shanghai and at the headquarter in Germany as well as the support of on-site activities for customers.

### Your profile:

- Electrical engineer, computer science engineer, physicist or similar
- At least 5 years of professional experience or a college degree
- Basic project management skills and knowledge of tools such as JIRA and MS Project
- Confidence when dealing with customers and suppliers
- Creative approach to complex tasks
- Experience in the field of 2D or 3D camera systems is an advantage
- Fluent in spoken and written English
- German language skills are an advantage
- Customer orientation and willingness to travel

### Your advantages:

- Innovative work environment
- Varied and broad range of tasks
- Attractive salary with variable components
- Most modern tools and work place
- Being part of a dynamic and highly motivated team
- Flexible working time
- Regular trainings

**can you imagine?** We're looking forward to meet you.
